WORK EXPERIENCE

 **FRONTEND DEVELOPER** Apr 2025 – Mar 2026
Asrotex Group – Dhaka, Bangladesh

- As a Frontend Engineer at Asrotex Group, I contribute to building and refining Pulse 366 – a modern web-based platform designed to streamline and manage the company's internal ERP and business-process workflows. I translate UI/UX designs into responsive, performant frontend interfaces using Nuxt.js, ensuring seamless experiences across modules. I collaborate closely with backend developers to integrate APIs built with Laravel & PostgreSQL, while developing reusable components and interactive features aligned with evolving business need.

 **FRONTEND DEVELOPER** Mar 2023 – Mar 2025
Lamp Techs – Dhaka, Bangladesh

- As a Frontend Developer at Lamp Techs, I focus on building dynamic, responsive, high-performance web applications with a strong focus on SEO best practices. I efficiently integrate backend APIs using a custom data-fetching system and consistently develop reusable, modular components to ensure clean code, scalability, and long-term maintainability across projects.

PROJECTS

 **PULSE 366**  [LIVE LINK](#)
Asrotex Group – Dhaka, Bangladesh

Pulse 366 is a platform that gives your business a continuous 366-day pulse. With modular workflows and AI-driven insights, it empowers teams to work faster, smarter, and more efficiently across the entire organization.

Key Features:

- Developed with Nuxt.js and Vuetify, with a backend using Laravel and PostgreSQL
- Smart alerts with email, device, and in-app notifications.
- Advanced permissions with role-based and user-wise CRUD control.

 **VLOO**  [LIVE LINK](#)
Lamp Techs – Dhaka, Bangladesh

VLOO is a web application based in Norway, designed to help you maximize your business potential by offering premium office space rentals with high-quality, flexible office spaces tailored to your needs.

Key Features:

- Developed with Next.js, Tailwind CSS, and Shadcn UI for a responsive and SEO-friendly design.
- Developed separate portals with LinkedIn/Google sign-up and a rental date selection calendar option.
- Built a comprehensive admin dashboard that consists of charts and a rich text editor.

REGULATED ADVICE

[LIVE LINK](#)

Lamp Techs - Dhaka, Bangladesh

Regulated Advice is a UK-based advisory site for offering services based on diverse topics and selecting your advisor suited to your financial needs.

Key Features:

- Developed using Next.js and Material UI for a seamless, SEO optimized and modern user experience.
- Integrated backend APIs with reusable components to ensure scalability and maintainability.
- Implemented a robust admin panel for streamlined content and data management.

SMART NIR

[LIVE LINK](#)

Lamp Techs - Dhaka, Bangladesh

Smart Nir provides sophisticated building management solutions through a Software as a Service (SaaS) framework, utilizing a monthly subscription model per apartment.

Key Features:

- Developed utilizing Next.js and Material UI, ensuring SEO optimization.
- Integration of backend APIs with reusable components.
- Implementation of a dedicated admin panel for efficient content and data management.

DESHI TRUST
